

This year the Education Committee put together a trip to Massachusetts to visit Titleist Ball Plant 3, Titleist Custom Ball Plant, Manchester Lane and play golf at The Bay Club at Mattapoisett!

All sixteen going on the trip met at Turning Stone Resort and Casino at seven in the morning and boarded a bus to Titleist Ball Plant 3 in New Bedford, Massachusetts. Upon arrival all sixteen were treated to lunch at Titleist Ball Plant 3, and afterwards were given a tour of the facility and shown exactly how Titleist makes the "#1 Ball in Golf." The tour guide all mentioned the dedication and detail that each and every worker puts in to ensure that every single golf ball they are producing is consistent and dependable for every level of play.

After the tour of Titleist Ball Plant 3, the group headed to the Manchester Lane Test Facility. The Manchester Lane Test Facility is Titleist's state-of-the-art golf ball research and testing facility in Acushnet, Massachusetts. Manchester Lane operates as the proving grounds for all Titleist golf ball products and serves a dual role as a Tour Fitting Center, offering premium club fitting services.

After the tour completed the group all went to dinner and got up the next day to tour the Titleist Custom Ball Plant. Just like the tour of the Titleist Ball Plant 3, the group was shown the levels that Titleist goes to in order to create golf balls that are consistent and in this case, custom to each customer.

Following the tour of Titleist Custom Ball Plant, was playing at The Bay Club at Mattapoisett. The weather was cool with some sun and slight wind. After completion of the round, the trip was officially over and the journey back home began.
